[the role of activated charcoal in plant tissue culture](#)

1.. Introduction Activated charcoal (AC) is composed of carbon arranged in a quasi-graphitic form in small particle size. It is a porous and tasteless material and is distinguished from elementary carbon by removal of all noncarbon impurities and the oxidation of carbon surface (Budavari, 1996, Mattson and Mark, 1971). AC has a very fine network of pores, an extraordinarily large surface area ...

[revitalization of the majestic chestnut chestnut blight](#)

The fungus was already wide spread in the north-eastern U.S. by 1904, but there were no reports of it south of Virginia (34). Metcalf and Collins suggested that Japanese chestnut trees (*C. crenata* Siebold and Zuccarini), which were first imported in 1876 (40), were the source of the pathogen (Fig. 4). A large number of grafted and seedling Japanese chestnuts were imported by 1900 (40), and it ...
